**March 5<sup>th</sup>- 9<sup>th</sup>, 2018 9:00am-4:00pm**

This week is designed for curious minds who love building things! This workshop will provide children with the exciting opportunity to learn about the world of robots! They will explore the fundamentals of robotics (basic laws of physics, principles of motion, electronics and more!) and will work together to create and program robots using the LEGO Education WeDo kits. In pairs, students build two different robots and program them with a computer to move, react, and make sounds in order to solve challenges. Their robots will come alive!
